REMARKS

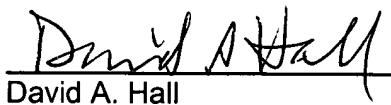

This Preliminary Amendment in the pending continuation application provides amendments to the claims for greater clarity. The pending independent claims have been amended to recite that the radiant intensity profile of the illumination source is reconstructed, as disclosed in the specification in conjunction with the description of Figure 19 and Figure 20.

This document is being filed with a Response to Restriction Requirement and Request for Reconsideration, in which Claims 1-35 are being elected for further prosecution. Therefore, in this Preliminary Amendment, Claims 36-47 are indicated as withdrawn.

Entry of the amendments and examination of the application on the merits are respectfully requested.

Any fees that may be due in connection with the filing of this paper, or during the entire pendency of this application, may be charged to Deposit Account No. 50-1213.

Respectfully submitted,
Heller Ehrman LLP
